Project Description

The project ‘Eco-Entrepreneurship & Circular Economy: On the Path to Sustainable Change’ is set in line with the priorities of the Erasmus+ Programme and the general objectives of the call. The project is based on the need to increase the capacities of 6 youth organizations representing the Programme (North Macedonia, Serbia and Cyprus) and Partner countries of the Western Balkans (Bosnia and Herzegovina, Kosovo* and Montenegro) to work with the concepts of eco-entrepreneurship and circular economy, to be able to develop competencies of young people, young people with fewer opportunities in these areas, and to transfer the principles of circular economy in their practices to become more green, sustainable youth organizations ready to face ecological and sustainable challenges of 21st century.

The project **AIMS**:

-to raise the capacity of 6 youth organizations working with young people, including young people with fewer opportunities, outside of formal learning in the area of eco-entrepreneurship and circular economy. The consortium of the project brings together youth organizations active in the field of non-formal education, delivering activities based on methods, tools of non-formal learning actively supporting the active participation of the target groups, self-centred and peer-to-peer learning;

-the project consortium brings together youth organizations from Programme and Partner countries of the Western Balkans. Our partners from the Partner countries focus on empowering youth and supporting their active participation in their communities and societies. This project will provide our partners from Programme countries an opportunity to increase their capacities in the areas of eco-entrepreneurship and circular economy, the raise capacities of their staff, youth workers and their young people, young people with fewer opportunities. This target group will have an opportunity to directly participate in international mobility events (Work Package 3), and local workshops (Work Package 4). They will develop their competencies, and understanding of the concepts of eco-entrepreneurship and circular economy, get inspired by successful stories of their peers, they will develop their entrepreneurial mindset, and get motivated to take an active role in addressing the environmental issues in their communities and societies.

-the project supports the development of youth work in Partner countries in the Western Balkan. It improves its quality because it will provide the staff, and youth workers an opportunity to raise their competencies needed to address the topics of eco-entrepreneurship and circular economy in a quality way, implement learning events to raise understanding of young people on the concepts, and develop their competencies and challenging their attitudes towards ecology, sustainability, eco-entrepreneurship, and circular economy;

-the project will bring two key deliverables in the form of an ONLINE COURSE on UDEMY and BOARD GAME that will be freely accessible. These key deliverables will be tailored to the needs of youth organizations, youth workers, and leaders in Programme and Partner countries and will be developed to support the development of youth work in all participating countries;

-the project is strongly contributing to the implementation of the EU Youth Strategy including the 11 European Youth goals:

.....

-Goal: Connecting the EU with youth: the project will equip the partners, target groups with knowledge and understanding of the role of the EU in building a green and sustainable future. The target groups will understand better what's the plan in the areas of eco-entrepreneurship and circular economy and how the EU is supporting different actors to behave more green and sustainable;

-Goal: Sustainable and Green Europe: this goal is strongly tackled by this project. The young people directly involved in the activities delivered under Work Packages 3, and 4 will raise their knowledge and understanding of the concept of sustainability. They will learn about the principles of circular economy, get inspired by stories of eco-entrepreneurs, and learn what practical steps they can take to help to create a Sustainably and Green Europe;

-Goal: Youth Organisations & European Programmes: through the project, the consortium will actively promote the European Programmes and ensure that youth organizations, youth workers, young people will become aware of the possibilities that European Programmes provides;

-Goal: Quality Learning: through the activities, young people will not just develop their knowledge and understanding of eco-entrepreneurship and the circular economy. They will also develop competencies essential for the 21st century: working in a mix-intercultural environment, problem-solving, etc.
